

## **Super Escape Planning**

Escape plans are an important part of your safety check list.

- Draw a floor plan of your home, marking all doors, windows and smoke and carbon monoxide alarms.
- Show two ways out of each room in case your main exit is blocked by smoke and flames.
- · Agree on an outside meeting place.
- Practice your escape route with your whole family at least twice a year.
- If your smoke or carbon monoxide alarms sound, get out and stay out!
